DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 and 23-46 are drawn to an apparatus or method for conducting a bidding session comprising the steps of establishing a communication channel between a server and a remote web browser, transmitting status information, receiving a bid and transmitting an update of status information.
 - II. Claims 15-22 are drawn to a method for conducting a bidding session comprising, providing a memory area for storing bidding session-related data, providing security means for securing bidding session-related data and providing authorized access during a bidding session data.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of invention I can be practiced by an apparatus which at least (i) establishes a communication channel between a server and a remote web browser, (ii) transmits status information and (iii) receives a bid and (iv) transmits an update of status information. This apparatus (invention I), therefore is distinct from the apparatus of the invention II which is not capable of performing these processes.

3. A telephone call attempt was made on May 17, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
